# Unlimited access to ad-free music 24/7

Virtual Jukebox gives you access to one of the largest and most comprehensive music libraries in the world

With the Virtual Jukebox, you'll never need to think about sourcing music or keeping it up to date ever again.

Updated weekly with thousands of tracks, our music library contains millions of songs including every top 40 hit since the charts began.

We're also fully licensed by the rights societies, so you can be sure you're playing music legally in your venue.

We supply you with hardware that turns your existing sound system into a full featured jukebox and background music service.

Simply plug our box into your sound system and broadband internet connection and you're up and running within minutes.

There's no need for rewiring, updates, maintenance or cash collections and the whole system can be managed from any computer.

“

I was looking for something new, innovative, something that didn't look ugly on the wall, and most of all cost effective & revenue generating. I have found Virtual Jukebox delivers on all my expectations and more! Offering a jukebox service to compliment our venue without the hassle of rewiring and most of all easy to use! It gets the punters talking about MY venue, it gives me direct marketing opportunities all at my fingertips! The support has been fantastic! I would recommend this service to anyone wanting to offer a jukebox service that is completely unique!

Dan Simpson, Landlord
